

Supply seventy 2500 Specialty Series (SP) Allison fully Automatic Transmissions

Mitchell Powersystems, the sole UK & Ireland Distributor for Allison Transmission, supplied seventy 2500 Specialty Series™ (SP) Allison fully automatic Transmissions to Supacat for the UK MOD's Jackal High Mobility Truck Variants (HMT 400s).

We worked closely with the Supacat from the first installation of Allison's 2000 Series™ transmission over 23 years ago, and our Application Engineering Team also helped develop the latest proof-of-concept driveline. This unique driveline combination has proved its capabilities across the globe in many live military operational theatres.
