## Off-Highway Axle Overhaul and Repair

After a long and productive working life, Central Driveline can provide you with an overhaul and repair solution that will help your axles go even further.

Our overhauls return your axles to a just like-new condition, delivering the same high standards of performance, service life and quality as the original new product.

With over 60 years knowledge and experience in the off-highway driveline sector we are trusted to provide a quality service.

With decades of experience in the off-highway driveline industry our highly skilled Technicians create quality engineered solutions for Dana Spicer® axle customers powering a wide range of applications, including but not limited to:

- Dumpers, Telescopic Handlers, Excavators
- Front Loaders, Mobile Cranes
- Forklift Trucks, Reach Stackers, Side Loaders
- Tractors, Crop Handlers, Harvesting Machines
- Airport Tugs and Baggage Tows

Every axle is overhauled from the ground up.

Axles are disassembled part-by-part to clean, qualify and test. Each component is screened for the possibility of reuse to minimise cost for the customer.

New components needed are always genuine Dana Spicer® parts. Quality inside means you get a more reliable, dependable remanufactured axle.

Following final inspection axles will be primed, painted, and packaged/preserved as per instructions.

We also support other Dana brands including *Clark, Hurth, Kirkstall, GWB, Brevini and Graziano.*

We can also provide the same quality overhaul and repair service for non-franchise products including:

- **Axles:** Kessler, Axletech, Volvo, ZF, Omci, Caterpillar
- **Transfer Cases & PTO's:** Axletech, Kessler, Cushman, TwinDisc
- **Transmissions:** Turner, ITL, Volvo, ZF, Caterpillar
