

### Supply and Commission FPT Industrial N67ENTX engine Power Packs

This is first of an ongoing order for 6 x FPT Industrial N67ENTX power-packs supplied by Mitchell Powersystems to BenchMark Wireline Products which have been installed into their Skid Mounted Winch Logging Units for an oil and gas industry application. The FPT Industrial N67ENTX engine is a 6 cylinder in line diesel, producing: 175 kW (238 Hp) @ 2200 rpm - 1020 Nm @ 1500 rpm - TIER 3 / STAGE III A

We also made maintenance easier to monitor and manage by installing FPT Industrial's Remote Assistance data dongle for live monitoring of the engine and allow download of technical manuals.
